30

Score. Share of checks that are working.

Working 14 Broken 21 Missing 11

Broken 21

Sender domain authentication

critical email.sender-authentication

1 sender domain(s) are missing a pass on SPF, DKIM, or DMARC.

Fix: Publish the missing DNS records before the next campaign.

GDPR consent on forms

critical forms.gdpr-consent

1 live form(s) have no GDPR consent field.

Fix: Add a consent checkbox and store the lawful basis.

Tracking code on the public site

critical tracking.install-code

The public page HTML does not include the HubSpot tracking script.

Fix: Add the portal tracking code to the site layout.

Tracking on landing pages

high brand.page-tracking

1 published landing page(s) have no tracking script.

Fix: Add the portal tracking code to the landing page template.

Duplicate companies

high crm.duplicate-companies

1 domain(s) are shared by more than one company.

Fix: Merge companies that share a domain.

Duplicate contacts

high crm.duplicate-contacts

1 email address(es) are shared by more than one contact.

Fix: Merge the duplicate contacts and turn on a create-time duplicate rule.

Required properties filled

high crm.missing-required-properties

1 required property name(s) are below the fill ratio: email.

Fix: Make the thin properties required on the create forms and backfill the blanks.

Workflow health

high email.workflows-health

1 workflow(s) are in error. 1 active workflow(s) have no enrolment.

Fix: Open the errored workflows and fix the failing action.

Form field mapping
high forms.field-mapping
1 form field(s) have no property mapping.
Fix: Map each field to a contact or company property.

Spam protection
high forms.spam-protection
1 live form(s) have no spam protection.
Fix: Turn on CAPTCHA or another spam control.

Sync errors
high integrations.sync-errors
1 app(s) and 1 webhook(s) report sync errors.
Fix: Open the failing sync and replay or pause it.

Email hooks by buyer stage
high journey.stage-hooks
6 journey stage(s) have no matching published email: lead, marketingqualifiedlead, salesqualifiedlead, opportunity, customer, evangelist.
Fix: Add one email or workflow for each uncovered stage.

Stale deals
high pipelines.stale-deals
1 sampled deal(s) have not been updated for 30 days or more.
Fix: Create a workflow that tasks the owner when a deal goes stale.

Cookie banner
high tracking.cookie-banner
The public page does not show a known cookie-banner marker.
Fix: Add a consent banner before non-essential HubSpot cookies load.

Original source attribution
high tracking.original-source
Original source is missing on too many sampled contacts.
Fix: Stop blank imports from clearing original source.

Favicon on landing pages
medium brand.favicon
1 published page(s) have no favicon.
Fix: Add a rel=icon link in the page head.

Landing page titles and descriptions
medium brand.page-meta
1 published landing page(s) are missing a title or meta description.
Fix: Fill the HTML title and meta description before the next campaign.

Lifecycle and lead status
medium crm.lifecycle-lead-status
1 contact(s) use a conflicting lifecycle stage and lead status.
Fix: Clear the conflicting lead status when lifecycle stage changes.

Webhook subscriptions
medium integrations.webhook-subscriptions
1 webhook subscription(s) are inactive.
Fix: Repair or remove the inactive subscription.

Deal stage probabilities
medium pipelines.stage-probabilities
1 later deal stage(s) are below 40% probability.
Fix: Set a realistic probability on each open stage.

Campaign links on live assets
medium program.campaigns
2 published page or email asset(s) have no campaign.
Fix: Attach each live asset to a campaign.

Missing 11

Nurture sequence
medium email.nurture-sequence
No active nurture sequence was found.
Fix: Add one short nurture for new leads.

Unengaged contacts
medium email.unengaged-handling
No workflow handles unengaged contacts.
Fix: Add a sunset workflow after a set number of unopened emails.

Follow-up email
medium forms.follow-up-email
1 embedded form(s) have no follow-up email.
Fix: Add a follow-up email or a workflow enrolment on submit.

Required fields per stage
medium pipelines.required-fields
1 pipeline(s) have a stage that does not require the configured fields.
Fix: Mark those properties required before a record can enter the stage.

Automation on stage change
medium pipelines.stage-automation
1 pipeline(s) have no stage-change automation.
Fix: Add a workflow or stage action for the first handoff stage.

Dynamic lists
medium program.dynamic-lists
No dynamic list was returned.
Fix: Build dynamic lists for the stages you email.

Lead score
medium program.lead-score
No lead-score property was returned.
Fix: Turn on predictive lead scoring or name your score property in the YAML.

Attribution reports
medium reporting.attribution
No attribution report was returned.
Fix: Add an attribution report for paid and organic channels.

UTM capture
medium tracking.utm-capture
UTM properties exist but most sampled values are empty.
Fix: Pass UTM parameters into hidden form fields.

Unused custom properties

low crm.unused-custom-properties

1 custom property name(s) have no values: favourite_glass.

Fix: Archive unused properties or start collecting them on a form.

Unused forms

low forms.unused-forms

1 live form(s) are not embedded.

Fix: Embed the form or archive it.

Working 14

Logo on landing pages

high brand.logo

Published pages include a logo image or SVG.

Fix: Put the logo in the shared page header.

Landing page call to action

high brand.page-cta

Published landing pages include a call to action.

Fix: Point the action at one form or one meeting link.

Published landing pages

high brand.published-pages

1 landing page(s) are published.

Fix: Keep a draft only while it is still being edited.

Subscription type on published emails

high email.subscription-coverage

Published emails are tied to a subscription type.

Fix: Keep one subscription type per email.

Live forms

high forms.live-forms

2 form(s) are not archived.

Fix: Archive forms that no page still embeds.

Email subscription types

high program.subscription-types

1 subscription type(s) are defined.

Fix: Map each marketing email to one subscription type.

Lifecycle funnel

high reporting.lifecycle-funnel

The contact sample spans 4 lifecycle stages.

Fix: Use the same stage names on the funnel report.

Landing page colour palette

medium brand.colours

Published pages use a stylesheet or a small colour set.

Fix: Keep new pages on that palette.

Page heading

medium brand.heading

Published pages include a level-one heading.

Fix: Give each landing page one h1.

Record owners
medium program.owners
1 owner record(s) are present.
Fix: Give every new contact and deal an owner.

Dashboards
medium reporting.dashboards
1 dashboard(s) are present.
Fix: Keep one operating dashboard for the revenue team.

Extra brand phrases
low brand.markers
No extra phrases are configured. Logo, favicon, heading, and colour checks still run.
Fix: Add params.markers only for words that must appear verbatim.

Connected apps
low integrations.connected-apps
1 app(s) are connected.
Fix: Remove apps you no longer use.

Ticket pipeline
low pipelines.ticket-pipeline
1 ticket pipeline(s) are defined.
Fix: Keep a closed stage and a required resolution field.
